Library of Congress Catalogue Number 70-76497

NOTES FOR THE GUIDANCE OF SEARCHERS IN THE MAIN INDEX

1. Alphabetical order is determined by treating each heading (excluding subheads) as a whole, whether composed of one word or several words. Thus **Aliens** would come between **Ali Bin Rashid** and **Ali Fahmy**.

Subheads do not affect the order of the main heading, from which they are separated by a colon; *e.g.*, **Bavaria: Royal Family** would come before **Bavarian League**.

Conjunctions and prepositions occurring in a heading are, for alphabetical purposes, treated in the same way as any other words.

2. Initials are treated as subheads except in the case of vessels bearing the name of a person, when the whole name is indexed as it stands. For example, **T. R. Horton, s.s.**, would come between **Treaties** and **Trials**.

3. It is sometimes impossible to subdivide a large heading into a single series of subheads. In such cases there may be one series (such as country-subheads) in alphabetical order, and another series (for various aspects of a subject or for events in a country) not necessarily in alphabetical order.

4. Where the names of two countries occur in a heading, the first in alphabetical order is placed first; *e.g.*, Japanese trade with Argentina would be found under **Trade and Commerce: Argentina and Japan**.

5. Oriental names are usually indexed as they stand, unless the first word is obviously a title, when it is placed at the end. This does not apply to Japanese names, which are indexed under the last name.

6. The heading **Loans** is subdivided according to the country raising the loan, *e.g.*, a loan from the Netherlands to Austria would be indexed under **Loans: Austria**, not **Loans: Netherlands**.

7. Correspondence with, or concerning, banks is assembled under the heading **Banks and Banking** without references under their names. In a similar way, entries are assembled under such headings as **Hospitals, Museums, Universities, &c.**

8. Affairs in Great Britain and matters connected with British administration, laws, colonies, &c., are indexed under **Great Britain** with its series of subheads in the same manner as in the case of foreign countries (but see paragraph 12).

9. Matters affecting individual diplomatic and consular posts are indexed under the name of the town in which they are established, *e.g.*, **London: Austrian Legation**. **Paris: British Embassy**.

10. It is important that searches should not be confined to the most likely subhead. The point at issue may have been originally overshadowed by other questions associated with it, and consequently indexed under some other subhead, or under the main heading alone. To save space, entries are not usually duplicated under different subdivisions of one heading.

Subdivisions of headings vary from year to year owing to fluctuations in the volume of correspondence. For example, in one year there may be a separate subhead under **Disarmament: Germany** for **Aeronautical Control**, while in the following year the number of entries on this subject may be so few that they would be indexed under **Disarmament: Germany** only.

It should also be remembered that a few papers, which have not passed through the Registry, are kept in the various Departments, and that no record of them appears in this Index.

11. A sequence of closely connected entries is indicated by a dash at the beginning of the second and subsequent entries. The word "file" indicates that the file as a whole is relevant and that its component papers have not all been indexed separately.

12. Search should usually be directed towards subject-headings rather than country-headings as the index is compiled as far as practicable under subjects in preference to countries.

13. The figures preceded by a letter are the numbers of individual papers: these are followed successively by the file number and the index number, the last indicating the country and archives-division.

Example of numbering:—

A613/A9214/613/45/N428/17/38 would stand for papers 613 and 9214 of the American series, kept in file 613 of subdivision 45 (*i.e.*, United States), and paper 428 of the Northern series, kept in file 17 of subdivision 38 (*i.e.*, Soviet Union).

14. A list of abbreviations current during the year is given on page v for convenience of reference, although not all of them appear in the index.

15. The following is a list of the index-numbers and departmental designations used in this index:—

byssinia (see Ethiopia)	Hejaz and Nejd (see Saudi Arabia)	Syria	(89)
Afghanistan (see Central Asia)	Honduras (see Central America)	Telecommunications (see supplementary numbers)	
Aviation (see Civil Aviation)	Hungary	Thailand (see Siam)
